Brainstorm & Idea Prioritization:

Step-1: Select the Problem Statement

Automated Network Request Management

Ideation & Problem Exploration

An individual ServiceNow project focused on automating the submission, tracking, approval, and management of network service requests.

- Individual Project
- Ideation Phase
- ServiceNow

Before Starting

A little preparation helps in clearly understanding the problem and generating meaningful ideas for the project.

- 1 Identify common problems**
Understand the challenges in manual network request handling, such as delays, lack of tracking, and repeated data entry.
- 2 Define the goal**
Plan to automate the submission and approval of network requests to make the process faster, transparent, and more efficient.
- 3 Plan the ServiceNow solution**
Think about the ServiceNow catalog, required variables, workflow for approvals, and tracking process for requests.

1 Define the Problem Statement

What problem are you trying to solve? Frame the problem as a "How might I" statement.

? How might I automate network request management so users can submit requests easily while approvals, tracking, and request handling are managed efficiently in ServiceNow?

PROBLEM
Manual network requests can cause delays, repeated data entry, limited visibility, and difficulty tracking approval status.

Key Principles for Brainstorming

- Focus on the real problem
- Think of multiple solutions
- Avoid early judgment
- Keep ideas practical
- Consider the user experience
- Prefer automation where possible

Step-2: Brainstorm, Idea Listing and Grouping:

Step-2: Brainstorm, Idea Listing and Grouping

Write down any ideas that come to mind to solve the problem of manual network request management in our organization using ServiceNow.

IDEAS
CREATE
IMPROVE

1 Brainstorm

Write down all possible ideas without judging. These can be features, improvements, or completely new ideas related to automating network request management.

2 Group Ideas

Look at the ideas and group similar ones together. Give each group a name based on the common theme.

Step-3: Idea Prioritization:

4

Step-3: Idea Prioritization

All the ideas generated in the brainstorming session are plotted based on their importance and feasibility to identify the most valuable and practical ideas for the Automated Network Request Management project.
